Popsicle Stick Craft & Design

Kinetic Popsicle Sculpture by Lewitt Eams

Pencil Cup / ensconet.org

Tips

Try different sized popsicle sticks for different projects.

Use a wood sealant for something such as a birdhouse that may exist outdoors.

Supplies & Tools

- Popsicle Sticks and Glue (wood glue would be stronger than white glue)
- Wood Stain, Paint or Markers if Color is Desired
- Heavy Duty Scissors or Craft Saw
- Paper Towels or old Rags for Cleaning
- Flat Space to Create
- **Optional Tools**
 - Hot Glue Gun (this tool could yield for stronger and faster bonding vs. white glue)

Preparation & Execution

1. **The Set Up.** After you have gathered your tools find a place to work.
2. **Think** about your overall design. Create a couple of practice shapes or projects you can create. You could sketch out your ideas to serve as a guide or potentially make a model in a program like Tinkercad.com
3. **When you're done,** take a few photos and upload to your social media and use **#urbanartsspace** and **#crafternoons**. If your young artist is working with you, also use **#artexplorations**
4. Do it again and don't forget to title your work!
